

### DEVELOP A PYTHON SCRIPT

Date	21-10-2022
Team ID	PNT2022TMID10999
Project Name	Real Time River Water Quality Monitoring and Control System
Maximum Mark	4 Marks

#### Script:

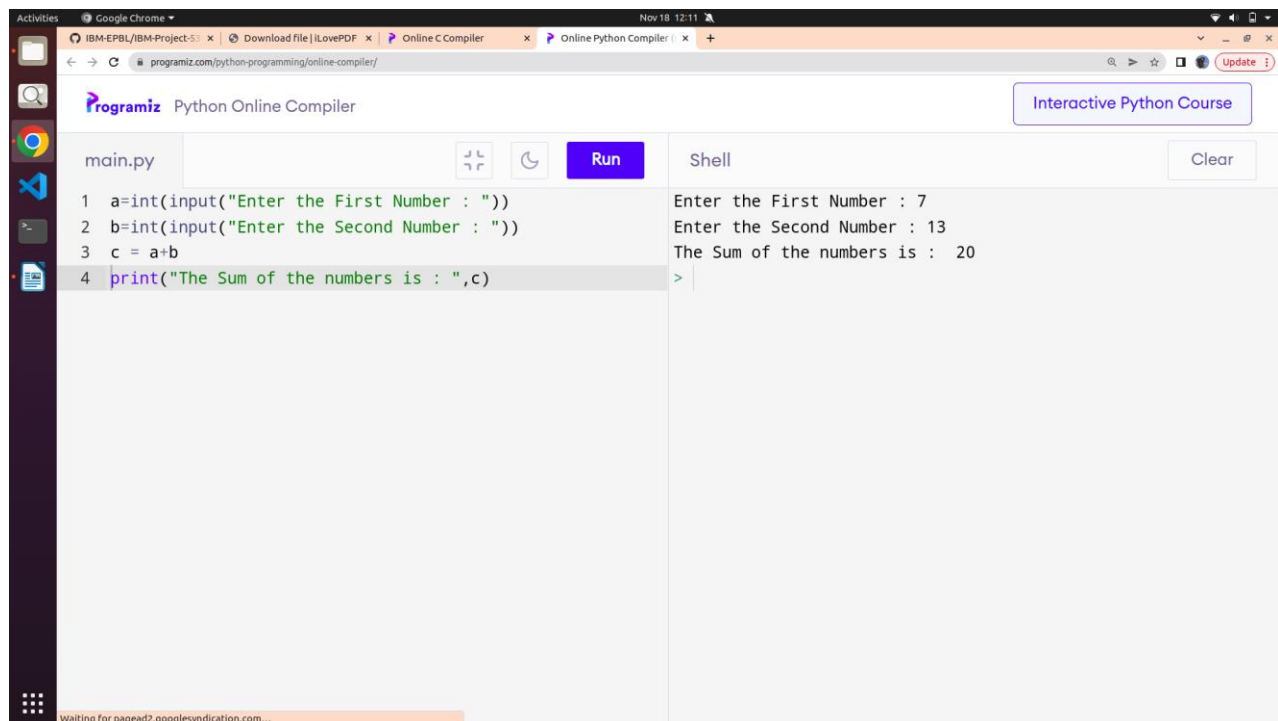

```
a=int(input("Enter the First Number : "))
```

```
b=int(input("Enter the Second Number :  
"))
```

```
c = a+b
```

```
print("The Sum of the numbers is : ",c)
```

#### Output:

The screenshot displays the Programiz Python Online Compiler interface within a Google Chrome browser. The browser's address bar shows the URL `programiz.com/python-programming/online-compilers/`. The compiler interface includes a file explorer on the left with a file named `main.py`. The code editor contains the following Python code:

```
1 a=int(input("Enter the First Number : "))
2 b=int(input("Enter the Second Number : "))
3 c = a+b
4 print("The Sum of the numbers is : ",c)
```

Below the code editor is a "Run" button. To the right of the code editor is a "Shell" window that displays the output of the program. The output shows the user entering the first number as 7 and the second number as 13, followed by the program's output: "The Sum of the numbers is : 20".
